

Klipper

Klipper is an alternative firmware for 3D printers' micro-controllers. The default firmware for most 3D printers is Marlin. Klipper consists of 2 parts, the micro-controller firmware to control basic motor and print head and software running on an attached general purpose computer like a Raspberry Pi or a PC.

Details on <https://www.klipper3d.org>

Octoprint was designed for Marlin firmwares, but can work with Klipper through a plugin: <https://all3dp.com/2/install-octoprint-klipper-single-board-computer-sbc/>

Installing Klipper and OctoPrint: The tool of our choice is [Klipper Installation And Update Helper \(KIAUH\)](#), which streamlines the installation process by reducing user inputs to the bare minimum and adding a graphical interface. It also helps manage updates and removal of every component.

[Arksine/Moonraker](#) is a Python 3 based web server that exposes APIs which client applications can use to interact with Klipper.

There are several Web interfaces that can interact with Klipper through Moonraker's APIs: Octoprint [Mainsail](#) by Mainsail-Crew
