

# Squid Proxy

```
sudo apt-get install squid
```

```
vi /etc/squid/squid.conf
```

```
#Comment out as below:  
#http_access deny all
```

```
#Add the below:  
acl remote src all  
http_access allow remote
```

Restart squid:

```
systemctl restart squid
```

Configure firewall to allow port 3128 from desired IPs only, otherwise this config will allow anyone from accessing it or nobody depending on firewall config.
