

# Steam Deck

## SSD replacement

<https://www.tomshardware.com/video-games/handheld-gaming/how-to-upgrade-steam-deck-ssd>

## Epic store

steam button → power → switch to desktop start discover from task bar or all apps search for “heroic games launcher” (x for virtual keyboard, left touchpad mouse movement) install start heroic games launcher login → epic games

open steam desktop client toolbar → games → add non-steam game to my library tick box of heroic games launcher click add selected programs close steam go back to gaming mode

<https://www.xda-developers.com/how-to-install-play-games-epic-games-store-steam-deck/>

Set heroic games launcher to minimise itself when launching game.

To access sd card for heroic games launcher, use this command with the path to the sdcard:

```
flatpak override --user --filesystem=/run/media/mmcblk0p1/
com.heroicgameslauncher.hg
```

(make sure it matches your SD Card address),

or use Flatseal to manage permissions of flatpacks. Start flatseal Select application to manage Scroll down in right panel to file system Add new entry and add path to sdcard without trailing slash

Find sdcard name using dolphin file manager

When installing using heroic games launcher, select other location, /run/media/mcnsdbb011
