

# Subtitles

## Auto Synchronisation

The following python tool can be used to let it analyse the audio and subtitle and synchronise the subs to generate a new synced file. It works for offsets at the beginning, not for sync issues later in the file.

<https://github.com/smacke/ffsubsync>

Install on Linux Mint 22+:

```
pipx install git+https://github.com/smacke/ffsubsync@latest
```

Usage:

```
ffs video_file.mkv -i orig_sub.srt -o new_synced_sub.srt
```

## Alternatives

Untested alternative without limitations: <https://github.com/kaegi/alass>
