

Upload file size

Native Javascript approach:

```
<!DOCTYPE html>
<html>
<head>
    <title>File Validation-1</title>
</head>
<body>
    <p>
        <input type="file" id="file" onchange="Filevalidation()" />
    </p>
    <p id="size"></p>
</body>

<script>
Filevalidation = () => {
    const fi = document.getElementById('file');
    // Check if any file is selected.
    if (fi.files.length > 0) {
        for (const i = 0; i <= fi.files.length - 1; i++) {
            const fsize = fi.files.item(i).size;
            const file = Math.round((fsize / 1024));
            // The size of the file.
            if (file >= 4096) {
                alert("File too Big, please select a file less than 4mb");
            } else if (file < 2048) {
                alert("File too small, please select a file greater than
2mb");
            } else {
                document.getElementById('size').innerHTML = '<b>' + file +
'</b> KB';
            }
        }
    }
</script>

</html>
```

jQuery approach:

```
<!DOCTYPE HTML>
<html>

<head>
    <meta http-equiv="Content-Type" content="text/html; charset=iso-8859-1"
/>
```

```
<title>JQuery File Validation</title>
<script
src="https://ajax.googleapis.com/ajax/libs/jquery/3.4.0/jquery.min.js">
</script>
</head>
<body>
    <input id="file" type="file" name="file" />
    <p id="output"></p>

    <script type="text/javascript">
        $('#file').on('change', function() {
            const size = (this.files[0].size / 1024 / 1024).toFixed(2);
            if (size > 4 || size < 2) {
                alert("File must be between the size of 2-4 MB");
            } else {
                $("#output").html('<b>' + 'This file size is: ' + size + "MB" + '</b>');
            }
        });
    </script>
</body>
</html>
```
