2025/04/19 16:12 1/1 Mint 21.3 to 22 upgrade

Mint 21.3 to 22 upgrade

Mint 21.3 to 22.0 upgrade

Can be done via GUI update manager.

Prep:

• remove libreoffice prior to upgrade

Config changes required after upgrade: - reinstall libreoffice - install mysql-workbench from mysql.com directly as not available in ubuntu repo yet - remove hypnotix if not used - compile notepadqq from source as ubuntu repo 2.00beta version from April 2024 crashes on autosave - Reinstall python applications/libraries. Ubuntu 24.04 Noble prefers pipx for user venv installations rather than pip or precompiled python packages from main repo
