

DokuWiki Synology DSM7

Synology's NAS system used to provide a DokuWiki package in their package manager. Since the DSM 7.0 release, this is no longer the case. Instead you need to manually install DokuWiki using the Web Station app.

Installing DokuWiki on DSM 7.0+

Synology does not currently provide a package for installing Dokuwiki on the Diskstation under DSM 7. This procedure should help to install Dokuwiki on a Synology Diskstation running DSM 7.

On DSM: Package Center: Install Web Station

- Install Apache 2.4 via the Package Center
Hint: go to Web Station Status Panel and click the Arrow in Management Column, this will bring you to the Apache Install Package in Package Center
- Install PHP 7.4 via the Package Center
Hint: go to Web Station Status Panel and click the Arrow in Management Column, this will bring you to the PHP Install Package in Package Center

The screenshot shows the Synology Web Station interface. On the left is a sidebar with navigation options: Status, Web Service Portal, Script Language Settings, and Error Page Settings. The main panel is titled 'General' and shows the following status information:

- Default server status: **Normal**
- Personal website status: **Disabled**
- Web service portal status: **Normal**

Below this is the 'Back-end Packages' section, which contains a table with the following data:

Name	Status	Management
Nginx	Normal	--
Apache HTTP Server 2.2	Not Installed	[Link]
Apache HTTP Server 2.4	Normal	[Link]
PHP 7.4	Normal	[Link]
PHP 7.2	Not Installed	[Link]
PHP 7.3	Not Installed	[Link]

In Web Station this will create a customized Profile under "Script Language Settings" with name 'user-defined'

- Edit the Profile and activate the following Extensions:
 - bz2
 - gd
 - ldap
 - openssl
 - pdo_sqlite
 - zlib

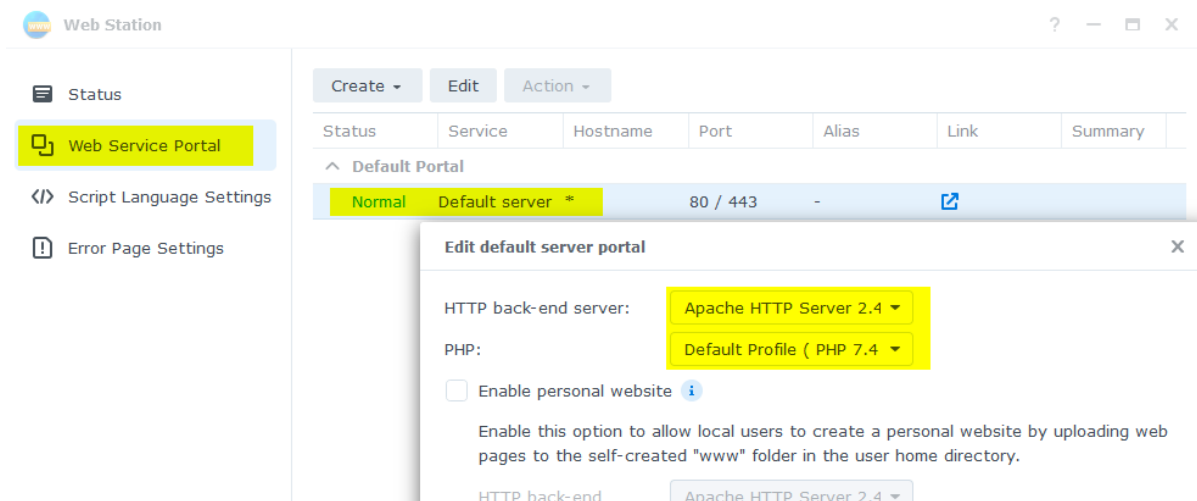

The screenshot shows the Synology DSM Web Station interface. On the left, the 'Script Language Settings' menu item is highlighted. The main panel shows the 'PHP' settings, with the 'Edit' button highlighted. Below this, a table lists the 'Customized Profile' settings, showing 'User-defined' as the selected profile, 'PHP 7.4' as the version, and 'Default PHP 7.4 Pro..' as the description. The 'Edit PHP profile' dialog is open, showing the 'Extensions' tab. The 'gd' and 'bz2' extensions are checked and circled in red.

Save the settings!

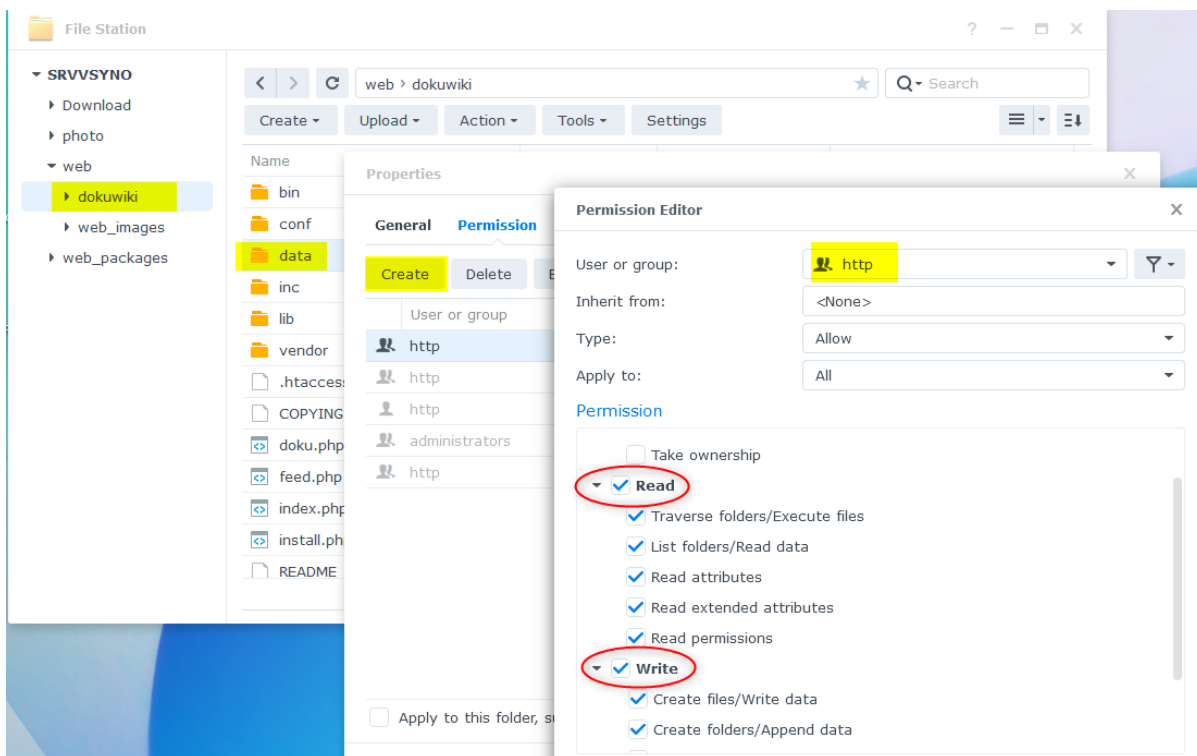

On your PC: Download DokuWiki: <https://download.dokuwiki.org/>

On DSM:

- Go to File Station
 - Select left the Web Folder
 - Upload the downloaded Archive from DokuWiki (TGZ)
 - Right Mouseclick on the Archive in File Station and select Extract... → Extract here
 - Do the same with the new File (TAR)
 - You have now the Folder "dokuwiki" in your Web-Folder
 - Delete TGZ and TAR File
- Go to Web Station and select "Web Service Portal"
 - Edit the default server
 - If installed Apache: Httpback-end server: select Apache
 - PHP: Select the created Profile (Default Profile 7.x)

- File Station: Setup Permissions for Folders
 - Go to Web Folder
 - Select dokuwiki Folder
 - Right Click on data Folder
 - Properties → Permission → Create:
 - User or Group: http
 - Select Read and Write
 - **Click Done**
 - **Click Save**

Repeat this steps for folders: dokuwiki/conf, dokuwiki/lib/plugins and dokuwiki/lib/tpl

Go to: http://<IP_of_your_Synology>/dokuwiki/install.php

Done.

Upgrading from DSM 6

There are several possible ways to switch from a package installation to a direct installation.

Copy, Uninstall, Copy back, Upgrade DSM

- copy the directory “dokuwiki” to another location **outside** the “web” folder
- uninstall the package “Dokuwiki” via the package manager
- copy the “dokuwiki” directory back to the “web” folder
- upgrade to DSM 7

Some users report problems with permissions after this procedure: [User Forum: Dokuwiki package no longer supported in Synology DSM 7](#). If this problem occurs, a complete reinstallation is recommended.

Backup, Uninstall, Upgrade DSM, Restore

This procedure is taken from [User Forum: Manual install of Dokuwiki in a Synology NAS running DSM6.2](#) It is the same procedure as for a [complete new installation](#). Only the backup of the data is added and the procedure for this is described.

1. To be extra save; copy the nas/DokuWiki folder from your Synology to a other location.
2. Delete the DokuWiki package with the Package Center.
3. Upgrade to DSM 7 (see instructions on the official Synology site)
4. Go to Webstation in DSM → PHP Setting (scripttaalinstellingen in my native language) → Create/Make → Profile name: Dokuwiki → Profile description: Dokuwiki → PHP version: PHP 7.4 → enable Extensions: bz2, gd, openssl and zlib and click Save/Ok.
5. Go to Webserviceportal (still in Webstation) and choose for HTTP back-endserver: Apache HTTP Server 2.4 and PHP: Dokuwiki (PHP 7.4.) → Save.
6. copy dokuwiki folder back into web directory
