

# Samsung Galaxy S2

If CM is already installed, gapps can be side-loaded by going into recovery, selecting adb, then on the pc using

```
adb sideload ./gapps-600-base-20151112-1-signed.zip
```

Gapps for CM13 can be found here:

<http://www.devfiles.co/download/xXYn6WFz/gapps-600-base-20151112-1-signed.zip> More links are here:

<http://www.cyanogenmods.org/forums/topic/download-cyanogenmod-13-cm13-marshmallow-gapps/>

If storage on the system partition is limited, the pico version might work:

<http://opengapps.org/?api=6.0&variant=pico>

CM12.1 and CM13 need a different partition size as gapps packages have become too big. This can help:
