

# Firefox External App Launcher

Addon Download: <https://addons.mozilla.org/en-GB/firefox/addon/external-application/>

Also required: <https://github.com/andy-portmen/native-client/releases> download, then unzip, then run installer

Example for dl option using remote yt-dlp (requires password-less preshared ssh keys)

```
Name: Download with yt-dlp on remote system
exec: gnome-terminal
args: -- ssh user@remotesystem "yt-dlp_linux [HREF] ; echo ''; echo 'press
enter'; read line"
Toolbar, page and link context
```

Small bash script to exit immediately if all went fine but stops on error:

[ytdlp-wrapper.sh](#)

```
#!/bin/bash
url=$1
tmp=$(mktemp -t ytdlp.XXXXXXX)
yt-dlp_linux $url 2>&1 | tee $tmp
grep -q -i "ERROR:" $tmp && (echo ""; echo "An error occurred. Press
any key"; read line;)
rm $tmp
```

Create in ~/.local/bin and copy yt-dlp\_linux into ~/.local/bin as well, then

```
chmod 755 ytdlp-wrapper.sh
```

Adjust the Firefox External App Launcher args to:

```
-- ssh user@remotesystem "ytdlp-wrapper.sh [HREF]"
```
