

Kodi nightly

For nightly snapshot releases of the next kodi development, use the following ppa:

</etc/apt/sources.list.d/team-xbmc-ubuntu-xbmc-nightly-jammy.list>

```
deb http://ppa.launchpad.net/team-xbmc/xbmc-nightly/ubuntu jammy main
# deb-src http://ppa.launchpad.net/team-xbmc/xbmc-nightly/ubuntu jammy
main
```

```
sudo apt-get update
sudo apt-get upgrade
```

Kodi downgrade

Old versions of Kodi binaries can be downloaded from here:

https://launchpad.net/~team-xbmc/+archive/ubuntu/xbmc-nightly/+packages?field.name_filter=&field.status_filter=superseded&field.series_filter=jammy

Further details and options to downgrade are here:

https://kodi.wiki/view/HOW-TO:Install_Kodi_for_Linux#Reverting_to_an_earlier_nightly

Downgrade scripts from Kodi 21 nightly to stable Kodi 20 - may require adjustments:

[kodidowngrade.sh](#)

```
#!/bin/sh
url="http://ppa.launchpad.net/team-xbmc/xbmc-nightly/ubuntu/pool/main/k
/kodi/"
sudo service kodi stop
cd ~
