sudo apt-get install libreoffice libreoffice-script-provider-python
sudo apt-get install kodi
sudo cp /etc/apt/trusted.gpg /etc/apt/trusted.gpg.d
sudo reboot
```

conf files

```
/etc/sleep.conf
/etc/mime.types
/etc/ssh/ssh_config
```

Config changes required after upgrade: - touchpad enable tap to click - don't change monitor scale to fraction (125%) but change display resolution instead. Monitor scaling does not work with all apps, particularly not with keepass2/mono.

```
