

Mint 21.3 to 22 upgrade

Mint 21.3 to 22.0 upgrade

Can be done via GUI update manager.

Prep:

- remove libreoffice prior to upgrade

Config changes required after upgrade:

- reinstall libreoffice
- install [mysql-workbench](#) from mysql.com directly as not available in ubuntu repo yet
- remove hypnotix if not used

```
sudo apt-get purge hypnotix
sudo rm -rf /usr/share/hypnotix/
rm -rf .hypnotix/
```

- compile [notepadqq from source](#) as ubuntu repo 2.00beta version from April 2024 crashes on autosave
- Reinstall python applications/libraries. Ubuntu 24.04 Noble prefers pipx for user venv installations rather than pip or precompiled python packages from main repo
